Instructions for Project Report of the Contest

A Project Report is a document which provides a mental image on the overall picture of the proposed technical approach. This is a perfect opportunity for the students to learn how to write a technical report for a project.

Project Report

Your report should be between 4-5 pages in one column PDF format. The following is a suggested structure for your report:

- Introduction (project Goal, problem statement)
- Data Preprocessing (handling outlier, missing and redundant samples)
- Feature Engineering (feature subset selection, creation, dimensionality reduction)
- Modeling Methods (cross-validation, ensemble)
- Results & Discussion (give a list of all your submission & achieved score)

Title Page

- Name of the Contest
- Team Name, Contestants Name, ID
- Kaggle & Git Account (with clickable link)

Submission: Please submit your project report in PDF format on [here](#) within announced time. You will also have to submit a **printed copy** before your presentation.

Notes:

1. Project Report should be submitted team-wise, i.e., each team should submit one report.
2. Each team should present their report into the class where each member of the team should present his contribution of the contest.
3. Each team have allowed **5 minutes** to present their report and **3 minutes** for QA.
4. Each team should have asked **one questions** to the presenter about their report.

Honor Code

You may consult with other Kaggle contest solutions and report. However, under no circumstances may you look at another team's report.

Remember

1. You don't have to make a ppt slides. Your submitted report is enough for the presentation.
2. You don't have to spend your time on styling report or enhancing your dress-up for the presentation.
3. Concentrate on the contents of the report.
4. Prepare for the oral questions that the instructors and other teams may have asked.
